

A facility to search EID/UID details in the SRDH is provided for akshaya entrepreneurs.

There are three options in the portal. In all these options some of the fields are mandatory. For searching in resident name column and house name column, minimum one character is enough. Start the search with minimum characters. If the result is many pages then try to search with more number of characters. And finally you will get the required result.

- These fields are not case sensitive. But the words in the resident name and house name should be in order as given during enrolment. For example if the name of the resident is 'manoj R' and If we search R manoj then we will not get the result. If we search 'man' as the name then all the names which start with 'man' will be shown. Manoj R and Manoj. R are considered different entity during search.
- Pincodes in kerala can only be searched.
